

Kitchen Cleaning Guide

Kitchen Cleaning Guide: How to Carryout General Cleaning

Preparation of the Area

- All kitchen equipment is potentially dangerous and should be handled with care.
- Ensure that appropriate time is left for hot items such as ovens, grills and hot plates to cool before attempting to clean.
- Protect hands when removing items from heated equipment such as dishwashers.
- Prevent injury when removing dishes, be wary of sharp objects in the sink and dishwasher.
- To ensure general efficiency for food hygiene and cleaning, ensure all equipment and food have designated areas.
- Surfaces and equipment can be damaged if the correct cleaning agents are not used, seek manufacturers advice if you are uncertain.
- Hazardous wet surfaces may need warning signs to prevent slippage and injury.
- Consult your cleaning schedule to select correct chemical and correct colour coded cloth.

General Kitchen Cleaning Advice

- When cleaning kitchen surfaces mix the appropriate solution in a bucket of water. In many instances warm/hot water is preferential however take care.
- Using clean equipment such as mops and cloths, wipe down all external surfaces.
- Rinse clean these surfaces with hot water and allow the surfaces to air dry before use.
